EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Steven M. Santisi on 07/25/2007.

In the Claims:

21. (Currently amended) A computer [program product] readable medium for enqueueing flows in a scheduler for a network processor, comprising: a medium readable by a computer, the computer readable medium having computer program code adapted to: receive a first data frame corresponding to a first flow appointed for transmission from a first output port; enqueue the first flow to a first scheduling queue associated with the first output port; receive a second data frame corresponding to a second flow appointed for transmission from a second output port; and enqueue the second flow to the first scheduling queue, the first scheduling queue also being associated with the second output port; wherein the first scheduling queue is used for

weighted fair queuing based in part on a relative bandwidth of the output port from which the respective flow is appointed for transmission.

22. (Currently amended) A computer [program product] readable medium for transmitting data frames from a network processor, comprising: a medium readable by a computer, the computer readable medium having computer program code adapted to: dequeue a first flow from a first scheduling queue; transmit from a first output port a data frame associated with the dequeued first flow; dequeue a second flow from the first scheduling queue; and transmit from a second output port a data frame associated with the dequeued second flow, the second output port being different from the first output port; wherein the first scheduling queue is used for weighted fair queuing based in part on a relative bandwidth of the output port from which the respective flow is appointed for transmission.

23. (Currently amended) A computer [program product] readable medium for operating a data communication apparatus that includes a scheduler having one or more scheduling queues, the computer [program product] readable medium comprising: a medium readable by a computer, the computer readable medium having computer program code adapted to assign a plurality of output ports to a first of the one or more scheduling queues; wherein the

first scheduling queue is used for weighted fair queuing based in part on a relative bandwidth of the output port from which the respective flow is appointed for transmission.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: Claims 1-3, 5-9, 11-14, 16-23, are considered allowable since when reading the claims in light of the specification, none of the references of record alone or in combination disclose or suggest the combination of limitations specified in the independent claims. As to claims 1-3, 5-7, the prior art of record does not teach wherein a relative bandwidth of one of the output ports is used to assign one of the data flows to one of the scheduling queues. As to claims 8, 9, 11 and 12, the prior art of record does not teach wherein the first scheduling queue is used for weighted fair queuing based in part on a relative bandwidth of the output port from which the respective flow is appointed for transmission. As to claims 13-14, the prior art of record does not teach wherein the first scheduling queue is used for weighted fair queuing based in part on a relative bandwidth of the output port from which the respective flow is appointed for transmission.

As to claims 16-18, the prior art of record does not teach wherein the scheduling queue is used for weighted fair queuing based in part on a relative bandwidth of the

Art Unit: 2616

output port from which the respective flow is appointed for transmission. As to claim 19, the prior art of record does not teach wherein the first scheduling queue is used for weighted fair queuing based in part on a relative bandwidth of the output port from which the respective flow is appointed for transmission. As to claims 21, 22 and 23, the prior art of record does not teach wherein the first scheduling queue is used for weighted fair queuing based in part on a relative bandwidth of the output port from which the respective flow is appointed for transmission. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alexander Boakye whose telephone number is (571) 272-3183.
